

# POWER STATEMENTS

Show me.

Draw it.

About how much is that?

What is 10 or 100 or 1000 more  
or less than that?

What is ten times that number?

What is the most or greatest?

How do you know?

What is the least or smallest?

How do you know?

What else can you tell me about  
those numbers?

So?

When would you use this math?

Can you give me an example?

Convince me.

How do you know?

How big?

How much?

How far?

Why?

How did you get that?

Is that reasonable?

Is there a different way?

Can you explain your thinking?

How did you get that answer?

How do you see it?

Explain how you knew that.
